

SITRA PUBLICATIONS

SI. NO	BOOK TITLES	MEMBER RATE	NON-MEMBER RATE
BOOKS:			
B1	50 Years of Growth of SITRA.....	300	300
B8	Maintenance Management in Spinning (reprint 2016)	300	400
B12	Practical Guide to Reactive Power Management in Industry.....	250	300
B14	Fundamentals of Electricity Management in Industry (Tamil)	350	450
1	Achievable Levels of Yarn Elongation and Hairiness based on Fibre Properties & Process Variables	45	50
2	A Framework for Estimating Savings and Losses from Product Mix, Operational and Commercial Parameters in a Spinning Mill	20	25
4	A Study on the Influence of Fibre & Yarn Parameters on Lint Shedding Propensity.....	10	15
5	A Study on the Properties and Processing Performance of Bt-Cottons	45	50
6	A Study on the Quality of Yarns Made of Man-Made Fibers and its Blends.....	20	25
7	A Study to Assess the Financial and Operational Strengths and Weakness of Spinning Mills for Rehabilitation of Potentially Viable Spg Mills.....	15	20
8	A Study on Two-for-one Twisting	20	30
9	A New Methodology to Arrive at Combing Efficiency Using Single Fibre Length Data	30	45
10	A Study on Packing Materials Cost in Spinning Mills.....	45	70
11	Achievable Efficiency in Conventional Cone Winding with EYC and Splicers - Ready Reckoner Tables.....	75	100
12	Achievable Production in Doubler Winding Machines	25	30
13	An Energy Efficient Control System for Water Cooling Towers in Textile Industry - "SITRA ENERCOOL"	20	25
14	An Energy Efficient Control System for Humidification Plants - "SITRA Climo Control"	45	60
19	Deviation Rate in Yarn Mass and its Effect on Fabric Appearance.....	40	45
20	Development of Fire Resistant Yarns & Fabrics by Air-Jet Spinning.....	10	15
21	Development of a Technology Package for Speciality Polyester Fibres	20	25
22	Development of ASTM Yarn Appearance Standards on EIB for Fine Yarns	10	15
24	Dynamic Tensile Properties of Yarn and Prediction of Yarn Behavior During Mechanical Processing.....	10	15
26	Energy Conservation in Overhead Travelling Cleaners Used in Textile Mills - "SITRA PCRA OHTC ENEROPTIMISERS"	30	45
28	Energy Efficient Drive Control System for Automatic Cone Winding M/c SITRA ENERCONER	25	30
29	Evaluation of Knitting Behaviour Using Artificial Neural Network	40	50
31	Improvement of Light Fastness of Reactive Dyed Cotton Textiles	45	50
38	Measures for Sustaining Profitability of Spinning Mills	25	35
41	Online Monitoring of Yarn Contamination on Weft Knitting and Winding M/c.....	15	25
42	Operatives Employment Pattern in Spinning Mills	45	60
44	Production Pattern and Product Diversification in Spinning Mills	45	60
47	Qualitative and Quantitative Requirements of Cotton in 2004-5.....	10	15
48	Quantitative and Qualitative Requirements of Cotton in 2010	20	30
49	Ready Reckoner to Convert Oven Dry Mass to Conditioned Dry Mass of Blended Materials	10	10
51	SITRA FlexiMark - A Computerised System For Marker Making in Garment Industry.....	25	30
52	SITRA Motor Relay Tester - A Device to Test Over Load Relays in Textile Mills.....	20	25
53	SITRA Motorised Yarn Appearance Winder	10	15
54	SITRAMiniSPIN-Miniature Spinning Frame For Test Runs	20	25
55	Studies on Spinning Behaviour, Anti-Fungal and Thermal Properties of Bamboo Fibres	30	45
57	Weak Spots in Cotton Yarns and Factors Influencing the Same	40	45
60	WTO and its Impact on Indian Textile & Clothing Industry	50	70
61	Yarn Production Pattern, Changes and Trends During 1993-2001	20	25
62	Yarn Quality Improvement with "SITRA CON-HAIR" in Manual cone winder.....	10	15
64	Azoic Dyes - Studies as per German Ban	10	15
68	Processing of Silk Cotton blends in short staple ring spinning system-some studies	60	80
70	A Study on the Cost & Quality of Fabrics Imported by the Garment Industry Vis-a-Vis that of Fabrics Sourced from within the Country	70	90
71	Highlights of Emerging Technologies at ITMA - 2007, Germany.....	70	90
72	Design and Development of An Instrument to Evaluate Staple Fibre Processing Propensity.....	50	70
73	A Physicochemical Method for the Estimation of Flax content in Flax/cotton Blend	40	60
74	Evaluation of Comfort Properties & Dyeing Characteristics of Fabrics made out of Compact Yarns.....	40	60
75	Technical Textiles - SITRAs Contributions	50	80
76	Optimum Twist in Roving Based on Fibre Properties & Roving Hank	60	90

SI. NO	BOOK TITLES	MEMBER RATE	NON-MEMBER RATE
77	Optimisation of Roller Settings in Sliver lap, Ribbon lap and Comber Draw box.....	60	90
78	Modernisation of Machines in Spinning Mills	130	180
79	Interaction of the Properties of Individual Cotton Fibres in a Blend	50	60
84	Studies on Gassing and Mercerizing of Combed Cotton Yarns	60	80
85	Impact of Power Cut on the Performance of Spinning Mills.....	180	250
86	Achievable levels of Tenacity and Evenness in Compact Spun Yarns	60	80
87	Energy conservation in compressed air system of textile mills.....	60	80
89	An Inter-Mill Study on Packing Materials Cost in Spinning Mills.....	90	120
93	A study on the economics of stationary auto doffers in ring frames	50	70
94	Energy efficient control system for air compressors-"SITRA PCRA ENERCOMP"	40	60
102	High performance polymer narrow width fabrics as load bearing member in opto-electronics sensor system.....	50	80
103	Quantitative and qualitative requirements of cotton in the 12th five year plan period	60	90
108	How can a participant mill make use of the CPQ Study data to improve its performance? A case study.....	50	75
109	A Study on Factors Responsible for the Generation of Hard Waste in the Auto Winders	70	100
113	An Insight of ITMA 2015 held at Milan, ITALY	110	150
114	33 rd Productivity Survey in Spinning Mills 2016.	600	800
115	Influence of Combing of Process/ Cotton Blended Material on Yarn Quality Compared to the Traditional Process	75	125
116	How to estimate sort-wise yarn to grey woven fabric conversion cost correctly? – SITRA Method	80	100
MILL CONTROL REPORTS:			
M2	SITRA's Work on Financial Performance of Spinning Mills and Measures to Reduce Cost (19991 - 2000) MCR No.18	10	15

SITRA FOCUS

		Price per Copy in Rs.			
		Members Rs.30/-each		Non-Member 50/- each	
		Vol.	Month	Year	No.
1	Outgoing Yarn Control in conventional Cone winding.	1	Jan.	1984	5
2	Fibre Damage During Spun Yarn Manufacture	2	Mar.	1985	2
3	How to Achieve High Rate of Production per Spindle	3	July	1985	2
5	Significance of Span Length	3	Mar.	1986	6
7	Lea Count & Strength Testing	5	Mar.	1988	6
8	Control of Yarn Strength & Its Variability	6	July	1988	2
9	Achievable Productivity Levels	7	May	1989	1
10	Doffing Boy Productivity in Ring Spinning	8	Sep.	1990	3
11	How to Arrive at Wages Cost Cost-Wise from HOK	8	Jan.	1991	5
12	Export of Indian Cotton Yarns	9	May	1991	1
13	Pract. Aspects of Testing: Single Yarn Tenacity & Elongation	10	Sep.	1992	3
15	Returns From Modernisation Impact of Tax Reduction	15	Nov.	1997	4
18	Impression of ITMA Part IV - Drives, Special Equipment and Textile Ancillaries	17	Jan	2000	5
19	Index of Blend Irregularity - Concept of Application	18	Nov.	2000	4
20	SITRA's Work on Modernisation During 1991-2000	18	Mar.	2001	6
23	Failure Mode & Effect Analysis (FMEA) - A Gateway to Customer Delight	19	Jan.	2002	5
24	Speciality Polyester Fibres - An Insight	19	Mar.	2002	6
27	Special Type of Regenerated Cellulosic Fibres - A Glimpse	20	Nov.	2002	4
31	Impressions of ITMA 2003 - Part-I: Spinning, Preparator & Post Spg	21	Nov.	2003	4
32	Impressions of ITMA 2003 - Part-2: Quality Control Instruments	21	Jan.	2004	5
33	Returns From Modernisation and Impact of Reduction in Interest Rates	21	Mar.	2004	6
34	Technical Yarns Manufactured in Ring Spinning System - Part I	22	May	2004	1
35	Technical Yarns Manufactured in Ring Spinning System - Part 2	22	July	2004	2
36	Scientific Assessment of Work Assignments - Case Study of A High-Tech Mill	22	Sep.	2004	3
37	Cotton Stickness and its Effect on Spinning Process and Yarn Quality	22	Nov.	2004	4
38	Yarn Quality Requirements for Shuttleless Looms - Part 1	22	Jan.	2005	5
39	Yarn Quality Requirements for Shuttleless Looms - Part 2	22	Mar.	2005	6
40	ITME 2004 - Impressions of Emerging Trends in Short Staple Spinning Tech	22	May.	2005	1
41	Assessment of yarn strength at very high speeds	23	Sept.	2005	3
43	Highlights of Emerging Technology Witnessed at ITMA Asia 2005, Part – 1- Short Staple Spinning	23	Jan.	2006	5
44	Contribution Variance Analysis - Case Study	23	Mar.	2006	6
45	Highlights of Emerging Technology in ITMA Asia 2005 Part -2 - Fabric Formation	24	May	2006	1
46	Achievable Levels of Extra Sensitive Imperfections in cotton Yarns Based on Fibre Properties and Process Variables	24	July	2006	2
47	Tensile, Evenness and Hairiness Characteristics of Mainfold ring Spun Yarns	24	Sept.	2006	3
49	Environmental Management System (EMS) for Spinning Mills	24	Jan.	2007	5
50	Flame Retardant Textiles	24	Mar.	2007	6
51	Textile Industry and Information Technology	25	May	2007	1
52	Braiding Technology for the Manufacture of Technical Textiles	25	Jul.	2007	2
53	Optimisation of Staff Requirement in Spinning Mills - Case Studies	25	Sep.	2007	3
54	Cost Reduction in Spinning Mills - Case Study 2	25	Nov.	2007	4
55	3-D Narrow Fabric Using Para-Aramid Filament Yarns for Reinforcement of Opto-Electronics System -1	25	Jan.	2008	5
56	3-D Narrow Fabric Using Para-Aramid Filament Yarns for Reinforcement of Opto-Electronics System -2	25	Mar.	2008	6
57	How to Estimate the individual contribution of raw material, Machinery condition and process variables on yarn quality - an analytical approach	26	May	2008	1
58	Variance Length (VL) curves and deviation rate (DR) curves - Analysis and interpretation	26	July	2008	2
59	Managing Power shortage in spinning mills	26	Sep.	2008	3
60	Statistical Techniques Applicable in a Weaving Factory	26	Nov.	2008	4

SITRA FOCUS

		Vol.	Month	Year	No.
61	Yarn Costing - Case Studies	26	Jan.	2009	5
62	Estimation of Yarn Properties in Polyester/Cotton Blends	26	Mar.	2009	6
63	A Comparative Study on the Performance of Different Makes of Auto Levellers	27	May	2009	1
64	Break-Even Analysis for Spinning Mills	27	July	2009	2
65	Twist for Maximum Strength & Twist Contraction in Compact Spun Yarns	27	Sep.	2009	3
66	Measures initiated by the mills in tackling power cut	27	Nov.	2009	4
67	Spirality in Weft Knitted Fabrics - Causes and Control	27	Jan.	2010	5
68	Impact of Increase in cotton prices on profitability of a spinning mill	27	Mar.	2010	6
69	Colour Contamination in Grey and White Bleached Fabrics	28	May	2010	1
70	Optimisation of labour & Machine Productivity in Cone Winding Under Different Working Condition	28	July	2010	2
71	Yarn-Fabric Relationship in Ring and Compact Yarn Fabrics	28	Sep.	2010	3
72	How to Reduce End-Breaks in Ring Frames? - A Case Study	28	Nov.	2010	4
73	Measures to reduce cotton contamination in ginneries	28	Jan.	2011	5
74	How to improve yarn realisation in a spinning mill? - A Case Study	28	Mar.	2011	6
75	Nanotechnology in Textiles	29	May	2011	1
76	How to Estimate Economics of Modernisation	29	July	2011	2
78	Braided Preforms for Technical Textiles	29	Nov.	2011	4
79	How to optimise man power requirements in spinning mills? - A Case Study	29	Jan.	2012	5
80	Recent advances in medical textiles	29	Mar.	2012	6
81	Can a textile mill achieve 6 HOK in spinning	30	May	2012	1
83	No load power measurement in motors in spinning mills - case study	30	Sep.	2012	3
84	Improving yarn quality towards reducing knitted fabrics defects - CS	30	Nov.	2012	4
85	Case Study of a Spinning Mill Maintaining very low motor burnouts	30	Jan.	2013	5
86	Studies on a new fibre length tester towards process optimisation	30	Mar.	2013	6
87	How to increase yarn realisation in an OE Spinning Mill - Case Study	31	May	2013	1
88	Impact of inter-mill variations in the techno-commercial parameters on the financial performance of the spinning mills	31	July	2013	2
95	How RMC and YSP had fluctuated in 2013-14? – an analysis	32	Sep.	2014	3
96	Fabric defects by knitting machine – reasons and remedial measures – part I	32	Nov	2014	4
98	Impact of ring frame utilization on fibre to yarn conversion cost-an analysis	32	Mar	2015	6
99	How to optimize labour requirement in spinning mills? – a case study	33	May	2015	1
100	'kVAh' based electricity tariff systems	33	July	2015	2
102	Long Term Monitoring of Commercial Performance by Spinning Mills Illustrations	33	Nov	2015	4
104	Assessment of machinery condition: a new approach – a case study	33	Mar	2016	6
105	Distribution of end breaks in ring frames – a case study	34	May	2016	1
106	Measures to improve yarn realization in spinning mills – a case study	34	July	2016	2
107	Quality attributes of slub yarns – an investigation.	34	Sept	2016	3
108	Reflections of ITME 2016- Part 1 (Spinning Machinery and Testing equipment	34	Nov	2016	4
109	Commercial efficiency expected under standard operating conditions	34	Jan	2017	5
110	How RMC and YSP had fluctuated in 2016-17? - An analysis	34	Mar	2017	6
111	How techno- commercial parameters of compact yarn had changed during the last 8 years	35	May	2017	1
112	Machinery Audit in Spinning Mills - A Case Study	35	July	2017	2
113	Market Performance Evaluation for Cotton Yarns	35	Sep	2017	3
